

# Appendix D - Temporary Works and Propping Pre-Check

Use this before steel fixing begins and again before concrete is ordered.

|                      |  |                    |  |
|----------------------|--|--------------------|--|
| Project              |  | Area / grid        |  |
| Date                 |  | Checked by         |  |
| Drawing revision     |  | Weather / exposure |  |
| Contractor / foreman |  | Status             |  |

| Control item                               | Site note / evidence reference | Pass | Hold | N/A |
|--------------------------------------------|--------------------------------|------|------|-----|
| Props on sound bearing or sole plates      |                                |      |      |     |
| Prop spacing and verticality checked       |                                |      |      |     |
| Bracing installed against sway             |                                |      |      |     |
| Beam sides and edge forms restrained       |                                |      |      |     |
| Access route does not require prop removal |                                |      |      |     |

## Corrective actions / hold-point notes
